Ryan Zinke Secretary of the Interior for the United States

and

Scott Pruitt  
Administrator of the United States Environmental Protection Agency

Secretary Zinke  
and  
Administrator Pruitt

I am writing you to follow up on my contact with your offices prior to your confirmation.

Hopefully my correspondence has been directed to you by this time. If not; I am moving forward on my application for appointment by President Trump. I am contacting you to continue coordinating a change in monetary policy which will affect, at minimum, your divisions of water, wastewater, and point source water protection. Their entire departmental budgetary requirement will be eliminated without interrupting their duties.

I am working on adopting a water monetary exchange standard for those services. Just in case you haven't been kept in the loop I have attached the publically available thesis. As I informed Amy Holly Department of Interior office of Assistant Secretary for Policy, Management and Budget and Ms Kenny, the Director of the Office of Policy for the EPA; I am moving forward because President Trump would expect that I not sit idle while I wait for things with a higher priority in the Appointment process to work through their process.

I asked Ms Holly and Ms Kenny to be proactive and have reports ready for you with a preliminary economic impact analysis for the DOI and EPA. Ms Kenny was proactive and forwarded a request to Al McGartland at the EPA National Center for Environmental Economics to begin an economic impact analysis. Mr McGartland raised questions of economic theory; that my Congressman should have done long ago, for which he deserves Commendation if he did the preliminary analysis which is a simple inversion from liability to asset of the three divisions: water, wastewater, and point source water protection for both the EPA and the DOI. I told him the comprehensive analysis would be quite a labor and that it could wait. I was quoted by an analytic firm that such an analysis would be at least \$60,000.00. I have not had a response from Ms Holly. Personally, this has no reflection upon her. I am doing a great labor.

The mechanical aspects of those divisions will not change with the exception of any successful completion of work done in accordance with an approved environmental protection plan will be 100% deductible by the Contractee and the financial remedies are handled by the Sovereign Authorities of the Treasury Department that will be outlined in the adoption process under the Authorities of a monetary exchange policy. Policies and Authorities outlined in the Constitution referenced on the attached thesis. This will be a huge shift in perception; particularly of the EPA. Most have no idea what the Bureau of Reclamation or the Geologic Survey are.

This will allow us to uphold the commitment of President Trump to govern for all Americans not just Republicans, advance the conservative agenda to lessen the burden and invasiveness of big government, and advance the liberal agenda of environmental protection and create transparency at the Federal Reserve. It will allow us to once again subjugate the government of the United States to the Laws of Nature and Nature's God.

I notified Secretary Mnuchin of my requests outlined above and will not be surprised in receiving these reports. He will be responsible for coordinating with the Federal Reserve, who has been kept in the loop, and Secretary of State Tillerson so as not to take the international community by surprise. Adopting a Water Monetary Exchange Standard will create an economy based upon Capital Investment in our local infrastructure and local environmental protection; Trickle Up Economics.

I hope you will obtain these reports consolidate them together and get them to Secretary Mnuchin. This monetary policy change will result in a trillion dollar infrastructure investment over the next 20 years that is self-funding and will save the American People about 100 billion dollars the first year and about 50 billion per year thereafter. All of this will compound out and up through the economy.

Sincerely  
Michael Jackson  
Applicant for Presidential Appointment for Monetary Policy  
Annapolis, Maryland
